Algebraic Graph Theory

With 120 Illustrations

Springer

Contents

Preface	vii
1 Graphs	1
1.1 Graphs	1
1.2 Subgraphs	3
1.3 Automorphisms	4
1.4 Homomorphisms	6
1.5 Circulant Graphs	8
1.6 Johnson Graphs	9
1.7 Line Graphs	10
1.8 Planar Graphs	12
Exercises	16
Notes	17
References	18
2 Groups	19
2.1 Permutation Groups	19
2.2 Counting	20
2.3 Asymmetric Graphs	22
2.4 Orbits on Pairs	25
2.5 Primitivity	27
2.6 Primitivity and Connectivity	29
Exercises	30
Notes	32
References	32

3	Transitive Graphs	33
3.1	Vertex-Transitive Graphs	33
3.2	Edge-Transitive Graphs	35
3.3	Edge Connectivity	37
3.4	Vertex Connectivity	39
3.5	Matchings	43
3.6	Hamilton Paths and Cycles	45
3.7	Cayley Graphs	47
3.8	Directed Cayley Graphs with No Hamilton Cycles	49
3.9	Retracts	51
3.10	Transpositions	52
	Exercises	54
	Notes	56
	References	57
4	Arc-Transitive Graphs	59
4.1	Arc-Transitive Graphs	59
4.2	Arc Graphs	61
4.3	Cubic Arc-Transitive Graphs	63
4.4	The Petersen Graph	64
4.5	Distance-Transitive Graphs	66
4.6	The Coxeter Graph	69
4.7	Tutte's 8-Cage	71
	Exercises	74
	Notes	76
	References	76
5	Generalized Polygons and Moore Graphs	77
5.1	Incidence Graphs	78
5.2	Projective Planes	79
5.3	A Family of Projective Planes	80
5.4	Generalized Quadrangles	81
5.5	A Family of Generalized Quadrangles	83
5.6	Generalized Polygons	84
5.7	Two Generalized Hexagons	88
5.8	Moore Graphs	90
5.9	The Hoffman–Singleton Graph	92
5.10	Designs	94
	Exercises	97
	Notes	100
	References	100
6	Homomorphisms	103
6.1	The Basics	103
6.2	Cores	104
6.3	Products	106

6.4	The Map Graph	108
6.5	Counting Homomorphisms	109
6.6	Products and Colourings	110
6.7	Uniquely Colourable Graphs	113
6.8	Foldings and Covers	114
6.9	Cores with No Triangles	116
6.10	The Andrásfai Graphs	118
6.11	Colouring Andrásfai Graphs	119
6.12	A Characterization	121
6.13	Cores of Vertex-Transitive Graphs	123
6.14	Cores of Cubic Vertex-Transitive Graphs	125
	Exercises	128
	Notes	132
	References	133
7	Kneser Graphs	135
7.1	Fractional Colourings and Cliques	135
7.2	Fractional Cliques	136
7.3	Fractional Chromatic Number	137
7.4	Homomorphisms and Fractional Colourings	138
7.5	Duality	141
7.6	Imperfect Graphs	142
7.7	Cyclic Interval Graphs	145
7.8	Erdős–Ko–Rado	146
7.9	Homomorphisms of Kneser Graphs	148
7.10	Induced Homomorphisms	149
7.11	The Chromatic Number of the Kneser Graph	150
7.12	Gale’s Theorem	152
7.13	Welzl’s Theorem	153
7.14	The Cartesian Product	154
7.15	Strong Products and Colourings	155
	Exercises	156
	Notes	159
	References	160
8	Matrix Theory	163
8.1	The Adjacency Matrix	163
8.2	The Incidence Matrix	165
8.3	The Incidence Matrix of an Oriented Graph	167
8.4	Symmetric Matrices	169
8.5	Eigenvectors	171
8.6	Positive Semidefinite Matrices	173
8.7	Subharmonic Functions	175
8.8	The Perron–Frobenius Theorem	178
8.9	The Rank of a Symmetric Matrix	179
8.10	The Binary Rank of the Adjacency Matrix	181

8.11	The Symplectic Graphs	183
8.12	Spectral Decomposition	185
8.13	Rational Functions	187
	Exercises	188
	Notes	192
	References	192
9	Interlacing	193
9.1	Interlacing	193
9.2	Inside and Outside the Petersen Graph	195
9.3	Equitable Partitions	195
9.4	Eigenvalues of Kneser Graphs	199
9.5	More Interlacing	202
9.6	More Applications	203
9.7	Bipartite Subgraphs	206
9.8	Fullerenes	208
9.9	Stability of Fullerenes	210
	Exercises	213
	Notes	215
	References	216
10	Strongly Regular Graphs	217
10.1	Parameters	218
10.2	Eigenvalues	219
10.3	Some Characterizations	221
10.4	Latin Square Graphs	223
10.5	Small Strongly Regular Graphs	226
10.6	Local Eigenvalues	227
10.7	The Krein Bounds	231
10.8	Generalized Quadrangles	235
10.9	Lines of Size Three	237
10.10	Quasi-Symmetric Designs	239
10.11	The Witt Design on 23 Points	241
10.12	The Symplectic Graphs	242
	Exercises	244
	Notes	246
	References	247
11	Two-Graphs	249
11.1	Equiangular Lines	249
11.2	The Absolute Bound	251
11.3	Tightness	252
11.4	The Relative Bound	253
11.5	Switching	254
11.6	Regular Two-Graphs	256
11.7	Switching and Strongly Regular Graphs	258

11.8 The Two-Graph on 276 Vertices	260
Exercises	262
Notes	263
References	263
12 Line Graphs and Eigenvalues	265
12.1 Generalized Line Graphs	265
12.2 Star-Closed Sets of Lines	266
12.3 Reflections	267
12.4 Indecomposable Star-Closed Sets	268
12.5 A Generating Set	270
12.6 The Classification	271
12.7 Root Systems	272
12.8 Consequences	274
12.9 A Strongly Regular Graph	276
Exercises	277
Notes	278
References	278
13 The Laplacian of a Graph	279
13.1 The Laplacian Matrix	279
13.2 Trees	281
13.3 Representations	284
13.4 Energy and Eigenvalues	287
13.5 Connectivity	288
13.6 Interlacing	290
13.7 Conductance and Cutsets	292
13.8 How to Draw a Graph	293
13.9 The Generalized Laplacian	295
13.10 Multiplicities	298
13.11 Embeddings	300
Exercises	302
Notes	305
References	306
14 Cuts and Flows	307
14.1 The Cut Space	308
14.2 The Flow Space	310
14.3 Planar Graphs	312
14.4 Bases and Ear Decompositions	313
14.5 Lattices	315
14.6 Duality	316
14.7 Integer Cuts and Flows	317
14.8 Projections and Duals	319
14.9 Chip Firing	321
14.10 Two Bounds	323

14.11	Recurrent States	325
14.12	Critical States	326
14.13	The Critical Group	327
14.14	Voronoi Polyhedra	329
14.15	Bicycles	332
14.16	The Principal Tripartition	334
	Exercises	336
	Notes	338
	References	338
15	The Rank Polynomial	341
15.1	Rank Functions	341
15.2	Matroids	343
15.3	Duality	344
15.4	Restriction and Contraction	346
15.5	Codes	347
15.6	The Deletion-Contraction Algorithm	349
15.7	Bicycles in Binary Codes	351
15.8	Two Graph Polynomials	353
15.9	Rank Polynomial	355
15.10	Evaluations of the Rank Polynomial	357
15.11	The Weight Enumerator of a Code	358
15.12	Colourings and Codes	359
15.13	Signed Matroids	361
15.14	Rotors	363
15.15	Submodular Functions	366
	Exercises	369
	Notes	371
	References	372
16	Knots	373
16.1	Knots and Their Projections	374
16.2	Reidemeister Moves	376
16.3	Signed Plane Graphs	379
16.4	Reidemeister moves on graphs	381
16.5	Reidemeister Invariants	383
16.6	The Kauffman Bracket	385
16.7	The Jones Polynomial	386
16.8	Connectivity	388
	Exercises	391
	Notes	392
	References	392
17	Knots and Eulerian Cycles	395
17.1	Eulerian Partitions and Tours	395
17.2	The Medial Graph	398

17.3	Link Components and Bicycles	400
17.4	Gauss Codes	403
17.5	Chords and Circles	405
17.6	Flipping Words	407
17.7	Characterizing Gauss Codes	408
17.8	Bent Tours and Spanning Trees	410
17.9	Bent Partitions and the Rank Polynomial	413
17.10	Maps	414
17.11	Orientable Maps	417
17.12	Seifert Circles	419
17.13	Seifert Circles and Rank	420
	Exercises	423
	Notes	424
	References	425
